(PH Vorarlberg Feldkirch)

“Perturbations of Positive Semigroups on AM-Spaces”

Beginn: **17:00 Uhr**

Raum: **D 436**

Interessenten sind herzlich willkommen!

R. Denk, R. Racke, O. Schnürer

Abstract: We consider positive perturbations of positive semigroups on AM-spaces and prove a result which is the dual counterpart of a famous perturbation result of Desch in AL-spaces. As an application we present unbounded perturbations of the shift semigroup. Joint work with B. Jacob, J. Voigt and J. Wintermayr.

(invited by Prof. Dr. Robert Denk)
